

RV WET BAY WITH NS-RV INSTALLED

The NS-RV is so easy to install on any Recreational Vehicle (RV). Simply attach the NS-RV to your RV at the female connection for potable/city water, typically in the utility panel. Installation is possible even on older RV models without an elaborate utility panel and less space.

NS-RV SAVES SPACE AND TIME

The NS-RV can be left attached to the potable water connection saving you 100% of the space needed to store and transport a portable water softener and salt. And it fits in the palm of your hand.
